Programming with Structured Control Language (SCL)

Join this in-depth workshop to master the essentials of SCL, a versatile high-level, text-based language ideal for complex math operations, data handling with arrays, and advanced string processing. Learn how SCL can significantly simplify programming tasks compared to traditional ladder logic.

Topics Covered:

- **SCL Language Overview:**
Understand the fundamentals and structure of the SCL language.
- **Development:**
Explore best practices and efficient coding techniques in SCL.
- **Use Cases:**
Discover practical applications and real-world scenarios suited for SCL.
- **Debugging:**
Learn effective methods for troubleshooting and refining your SCL code.

Date: July 14, 2026

Location: **Milwaukee, WI**
N114W18770 Clinton Dr
Germantown, WI 53022

Time: 9:00 a.m. to 12:00 p.m.

Cost: FREE

Registration: [CLICK HERE](#) or [Scan QR Code](#)

**Class size must reach 10 participants or it may be subject to cancellation.*

Format:

- Presentation and Hands-On
- Interactive demonstrations with actual hardware

Training workstations and materials are provided during workshop.
